

SEVEN DAYS—SEVEN WAYS

ENERGY SAVERS COURTESY OF:

THE SOUTH DAKOTA PUBLIC UTILITIES COMMISSION

- ♦ **We've Got You Covered...** Open your window coverings to let in the sun to warm you. At night, close them to keep the heat in.
- ♦ **Shut that door!** Close a bedroom door and heat register during the day or close off an unused room entirely (savings to you...about \$50 per year!)
- ♦ **Filter of the Month:** Replace the furnace filter every month with a good paper filter.
- ♦ **The Lean, Clean, Furnace Machine:** A cleaned and tuned up furnace is a happy furnace. Have it professionally done every year.
- ♦ **The Leaky Faucet gets the Washer:** Fix this bad boy right away. A hot water faucet leaking only one drop per second can cost you \$35 per year!
- ♦ **Great Under Pressure:** Have your home pressure tested with a blower door to see just how your home rates on the energy efficiency scale.
- ♦ We have just one word for you (okay, so there's three...)
