Subject: Release for New Service from Southeastern Electric

I am requesting to have a new service installed in Douglas County through Southeastern Electric. My farm currently sits in Douglas County but is supplied by Southeastern Elec. I would like to add power to the section north of my farm on 36-100-62 in the SE corner. I want to build a two-wire high tensile fence and supply power to it for longer grazing period in the fall. I am in the process of putting a hydrant in the same location and would possibly use a tank heater, if need be, for the fall and early winter.

Southeastern service will cost \$5 Amp with a minimum of 200 Amp and has a \$400 new service charge.

Thanks,

Zita Bialas

Zita Bialas

I, Jay Spaans, had visited with Zita at her house about aid-to-const. cost. Douglas would be \$24,190.⁷⁰ to get her power for this seasonal electric service.
