2-11 South Dakota Data Request

Should the Commission approve the proposed budget increases, will MidAmerican file new pages to update the plan that was approved in docket GE12-005 that clearly show the new costs and energy savings for programs that changed?

Response:

As indicated in the response for Data Request 2-2, MidAmerican is not proposing wholesale changes to its 2014 budget from what the SDPUC approved in MidAmerican's 2013-2017 South Dakota energy efficiency plan. Exhibits A and B filed with the 2014 Energy Efficiency Plan Update included in this original filing show the new costs and energy savings for the programs modified for the proposed inclusion of residential furnace and heat pump costs and the requested increase for nonresidential furnaces and nonresidential lighting. MidAmerican did not plan to file new pages to update the plan if the Commission approved the proposed budget increases, but would be willing to do so if the Commission would find them helpful.
