

The pipeline will cross good farmland
How much will it devalue our land and
the amount of cash rent we receive.

Is Trans Canada responsible for clean up after
a leak, if one were to occur and what
condition would the soil be?

The pipeline will pass near a pasture which
has a creek and stock dam if there would be
a leak how would it affect the water?
The pipe should be much deeper than 4 ft.
Is it safe to operate large farm equipment
above the pipeline?

The pipeline will run thru $\frac{1}{2}$ mile of our
land (all good farm land) The payment amount
should be more. I-29 corridor would be
a better site.

Ed & Janet Schmit land owners - again.

Madison, S.D. 57042
605-256-9443

There should be an annual payment
each year to the landowner.
