Dear Sir:-

SOUTH DAKOTA PUBLIC
UTILITIES COMMISSION

I write of my great concern about the TransCanada Keystone Pipeline project.

The integrity of the pipeline & probable leaks over the years on farmland in SD is of great concern. Environmental damage to land & water way causes great alarm.

I would hope the pipeline company would take into consideration the concerns voiced by the people of SD and follow the Interstate corridor. Repairs could be found & quickly repaired using this route. It seems a commonsense answer and would up the companies standing with the people of this state. Lets hope they care enough to do so.
