

We bought our farm in the early 50's & had a 8x10" iron well that was about 10 feet deep that when we had the water tested they asked how we purified it we had not done anything but bottles a sample & send it to them. All our neighbors got water from that well. After awhile they started spraying, land for weeds and our well water was not fit to drink. We then had BDM water and I hope that doesn't happen again.

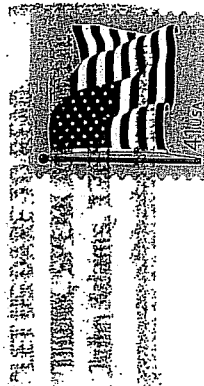

Please ask Trans Canada to move their pipes away from our water source aquifer.

L.E. Peterson
