Commissioners Hanson, Kolbeck & Johnson:

I believe that the plans for the Trans-Canada pipeline to locate its route through Marshall County is not good for this county, and as experts recently stated is dangerous to our BDM water source. I agree with them and it is unacceptable to put our water source at risk. I would encourage you to reroute this pipeline around our important water intake area! No matter how good statistics may look in regard to the record of the Trans Canada company, we all know when oil is involved - NO risk is worth putting the people of our great state in any danger... there is always a chance of error or accident.

Thank you for considering my request.
