Subject: Wind farm start of construction

Auto forwarded by a Rule

Please accept this as Formal Notice that the 98MW Campbell County Wind Farm (CCWF) will begin construction, effective date 5/15/2015. The project will be in Campbell County just south of the City of Pollock. GE 1.715-103 turbines will be utilized; we have already purchased 20 WTGs. The completion date of construction is dependent on the ability and timing of GE to provide the balance of the 37 turbines, it is our goal to be fully operational by 12/31/2015. An Interconnection Agreement with the Western Area Power Administration has been executed; CCWF will be connecting to the WAPA 230kV line running through the project footprint in conjunction with the Glenham substation. Western is requiring CCWF to provide significant network upgrades as part of the Interconnection Agreement.

Please contact me with any questions, thank you.
