

NOTE: IMPORTANT INFORMATION CONCERNING SOUTH DAKOTA NONRESIDENTIAL ENERGY EFFICIENCY PROGRAMS

Due to current participation levels, 2016 program funding for equipment such as variable speed drives, lighting and cooling equipment or custom systems using either natural gas or electricity installed in **nonresidential facilities** is depleted. As a result, MidAmerican Energy has suspended the 2016 electric Nonresidential Equipment program, and both the natural gas and electric Nonresidential Custom System programs, as of May 15, 2016.

Program funding continues to be available for nonresidential customers installing eligible natural gas furnaces, water heaters and programmable thermostats and for residential customers wanting to take advantage of the HomeCheck[®], Appliance Recycling, SummerSaverSM and Residential Equipment programs.

Please note these important points:

- MidAmerican Energy intends to resume the affected programs Jan. 1, 2017.
- Equipment installed and/or invoiced during the programs' suspension from May 15, 2016 through Dec. 31, 2016, will not be eligible for a rebate unless funding becomes available. All applications received will continue to be processed in the order received.

If you have questions about the programs or the status of a rebate application, call **800-894-9599**. Or visit our website, www.midamericanenergy.com/sd-bus-rebates.aspx for additional information.
