Northwestern Energy  
600 Market St. SW.  
Huron, SD 57350

RE: Briann & Lisa Larson Service

Dear Craig Fergen:

Central Electric will provide single phase electrical service as per the Larson's request located in the northeast quarter (NE ¼), of the northeast quarter (NE ¼), Government Lot One (1), of section two (2), of 103 North, Range 68 West, pending Northwestern Energy's territory release. Central Electric currently has existing electrical infrastructure located within 100 feet of this legal description. Prior to the electrical PUC territory being established Tri-County Electric, now doing business as Central Electric, provided underground electrical power to this location, but this service was requested to be disconnected and removed due to home being moved off a few years ago. If your company would be in agreement with this, as per this consumers request to have Central Electric provide electrical service to them, please prepare the necessary documentation to facilitate the request for PUC approval. Please contact me if you have any questions regarding this information.

Sincerely,

Brian Bultje  
Manager of Operations
