November 19, 2007

Mr. Dusty Johnson, Chairman  
Public Utilities Commission  
Capitol Building, 1st floor  
500 East Capitol Avenue  
Pierre, SD 57501-5070

Re Keystone Pipeline Project

Dear Sir,

I favor the construction of the Keystone Pipeline. I would like the Public Utilities Commission to give them a permit to go through the State of South Dakota.

This pipeline does nothing to harm the environment; it is buried in the ground. This pipeline is a rare opportunity to mitigate the tremendous cost of our reliance on overseas supplies.

The way I see it, the benefits certainly outweigh the risk to the development of this underground pipeline.

We urge the Commission to support the permit of Keystone's application.

Sincerely,

William E. Clark
