

*Clark*

1 about the large machinery, and I have some pictures that  
2 happened in our area this spring --

3 CHAIRMAN JOHNSON: Ma'am, I'm sorry, did you have an  
4 opportunity to state your name yet?

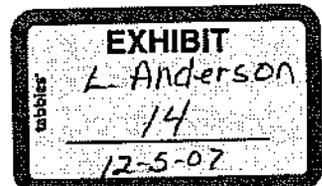

5 MS. OLIVER: Betty Oliver. Betty Oliver. And I have  
6 some pictures, and the lady was referring to the large machinery  
7 we have. And it took three tractors, one backhoe to dig this  
8 tractor this spring to get it out. And I would like to bring  
9 these up and show them to you all. Because I think it's quite  
10 devastating. This is what large equipment would do, and it  
11 would sit right on top of your pipeline. But I think you guys  
12 should keep these because it's a very good indication that  
13 4 feet is not very deep.

14 CHAIRMAN JOHNSON: Just so you all have an idea what's  
15 going on, we're just putting Ms. Oliver's name on the back of  
16 these pictures and we'll make these part of the record and if  
17 anybody wants to see them, they'll be available on the  
18 Commission website.

19 (Discussion off the record)

20 CHAIRMAN JOHNSON: We are going to go back on the  
21 record and thank Ms. Oliver for her pictures, and the Applicant  
22 has asked for an opportunity to respond. Go ahead.

23 MR. GRAY: You know, certainly the pictures that have  
24 been put forward here of farm equipment that is imbedded up to  
25 the axles. That would be the description I would give of it.

Anderson Exhibit #14
