II. SUMMARY AND CONCLUSION 15

Michael G. Williams states as follows:

My name is Michael G. Williams. My business address is 250 Bell Plaza, Room 1603-B, Salt Lake City, Utah. I am a Director in Wholesale Markets for Qwest Corporation ("Qwest"). I supervise the monitoring and reporting of Qwest's performance in providing services to competitive local exchange carriers ("CLECs") in accordance with the requirements of Section 271 of the Telecommunications Act of 1996 (the "Act"), 47 U.S.C. § 271, and manage related regulatory undertakings. I base this affidavit on my professional experience, personal knowledge, and information available to me in the normal course of my duties.

My rebuttal testimony focuses on comments filed by AT&T Communications of the Midwest ("AT&T") in response to my initial affidavit. In its comments, AT&T addressed two issues. First, AT&T discussed data reconciliation by The Liberty Consulting Group ("Liberty") and two observations issued by KPMG Consulting, LLC ("KPMG") on data issues in connection with the third-party OSS test. Qwest has asked that Bob Stright of Liberty Consulting file testimony on data reconciliation. As to the issues identified by KPMG in various observations concerning performance, I will be prepared to respond to those issues at the hearing beginning April 22, 2002. Responding at this time is difficult, as Qwest and KPMG have exchanged information, and I should have more conclusive information to report by the hearing. These

---

See AT&T Verified Comments Regarding Performance Data at 1-6 (March 18, 2002) ("AT&T Comments").

Observations and their current status including Qwest's responses thereto are, however, available on the ROC website for the Commission's review. Second, AT&T discussed a few isolated wholesale performance results.[2] I will respond to AT&T's comments on those results here.

I. QWEST'S WHOLESALE PERFORMANCE SATISFIES THE REQUIREMENTS OF SECTION 271.

A. The Commission Should Evaluate Qwest's Performance Under Each Checklist Item in its Entirety, Not on a PID-by-PID Basis.

Qwest's most recent performance report for South Dakota, which covers the period from March 2001 through February 2002, is submitted herewith as Exhibit MGW-PERF -1. That report includes 263 pages of performance results, with more than 800 charts showing results under negotiated performance indicator definitions ("PIDs"). In its comments, AT&T addressed only 11 of those charts. Moreover, AT&T discussed each of those charts in isolation, and utterly failed to consider Qwest's performance as a whole under each checklist item, which is the relevant standard for determining section 271 compliance. AT&T's approach contravenes the FCC's well-established standards for evaluating performance in a section 271 proceeding.

In the *New York 271 Order*, the FCC stated, "[W]e consider the overall picture presented by the record, rather than focusing on any one aspect of performance."[3] The FCC concluded,

---

[2] *Id.* at 6-14.

[3] *Bell Atlantic New York 271 Order* at ¶ 5 (Dec. 22, 1999). *See also id.* at ¶ 46 ("We look at each application on a case-by-case basis and consider the totality of the circumstances. . . .").

> The determination of whether a BOC's performance meets the statutory requirements necessarily is a contextual decision based on the totality of the circumstances and information before us. There may be multiple performance measures associated with a particular checklist item, and an apparent disparity in performance for one measure, by itself, may not provide a basis for finding noncompliance with the checklist. Other measures may tell a different story, and provide us with a more complete picture of the quality of service being provided.[1]

The FCC has followed this approach in all subsequent 271 Orders. For example, in the *Kansas/Oklahoma 271 Order*,[2] the FCC said, "We emphasize, however, that we do not view each particular metric as wholly dispositive of checklist compliance. . . . Ultimately, the determination of whether a BOC's performance is consistent with the statutory requirements is a contextual decision based on the totality of the circumstances."[3] Most recently, in the *Rhode Island 271 Order*, the FCC noted, "Where there are multiple performance measurements associated with a particular checklist item, the Commission would consider the performance demonstrated by all the measurements as a whole. Accordingly, a disparity in performance for one

[2] In the Matter of Joint Application by SBC Communications Inc., Southwestern Bell Telephone Company, and Southwestern Bell Communications Services Inc. d/b/a Southwestern Bell Long Distance for Provision of In-Region, InterLATA Services, 16 FCC Rcd at 6253, CC Docket No. 00-217, para. 31 (2001).

[3] *SBC Kansas/Oklahoma 271 Order*, at ¶ 31 (Jan. 22, 2001).

measurement, by itself, may not provide a basis for finding noncompliance with the checklist."

AT&T's comments, which focus on performance under a few PIDs in isolation, are inappropriate and do not warrant a finding of noncompliance with any checklist items. The specific issues raised by AT&T must be analyzed in the context of Qwest's overall performance under each checklist item.

B. Qwest's Performance Under Each Checklist Item is Satisfactory.

Viewed under the proper legal standard, Qwest's audited performance results demonstrate that it is providing service to competing carriers in substantially the same time and manner as Qwest provides to itself, and in a manner that allows an efficient CLEC a meaningful opportunity to compete, as required by Section 271. I will address the specific issues about South Dakota performance results raised by AT&T in the order in which they raised them.

1. PO-7 Billing Completion Notices

PO-7A measures the timeliness with which electronic billing notifications are made available to CLECs via the IMA-GUI interface. AT&T argues that Qwest's wholesale performance under this metric has fallen short of parity with retail.[3] In each

---

[2] *Verizon Rhode Island 271 Order*, In the Matter of Application by Verizon New England Inc., Bell Atlantic Communications, Inc. (d/b/a Verizon Long Distance), NYNEX Long Distance Company (d/b/a Verizon Enterprise Solutions), Verizon Global Networks Inc., and Verizon Select Services Inc. for Authorization To Provide In-Region, InterLATA Services in Rhode Island, FCC Rcd , CC Docket No. 01-324, FCC 02-63, App. D, at ¶ 9 (Feb. 22, 2002).

[3] AT&T Comments at 6.

of the last two months, however, Qwest's wholesale performance was actually better than retail, and in February 98.45% of notifications to CLECs were timely, the best performance ever.[9] Although Qwest failed to achieve statistical parity in November 2001, more than 98% of notices to CLECs were timely, and the 1.4% disparity between retail and wholesale performance is not competitively significant.[10] Thus, in three of the last four months, Qwest either achieved, or came very close to, parity.[11]

AT&T also argues that Qwest's performance under PO-7B, which measures timeliness of billing completeness notifications submitted via the EDI interface, was discriminatory.[12] This argument is competitively irrelevant because there are no CLECs that subscribe to receive this billing completion notification via EDI.[13] [14] In any event, if

---

[9] Ex. MGW-PERF-1 at 56, PO-7A.

[10] Id.

> Qwest's performance in December 2001 was subpar but atypical. The miss in December was caused by a CRM (Customer Record Manager) system release on September 29, 2001. An error in the code affected LSRs with multiple service orders. In these cases, only the first service order to complete would receive a billing completion notice. This coding did not impact the provisioning, completion, or posting to billing of the service orders. It also did not impact the presence of the service orders on the Loss and Completion Reports. The problem was identified in late November, the code was corrected in early December, and the clean-up to send all appropriate billing completion notifications was completed during the last half of December. As a result, Qwest failed to achieve parity in December, and barely missed parity in November. Now that the code has been fixed, this problem will not recur.

[11] AT&T Comments at 6-7.

[12] Prior to Jan 02 PO-7B was reported based on the time the notice was "made available" per the PID. In Jan 02 Qwest developed the capability to report based on transmission time and since no CLECs are receiving this notification via EDI there are no longer any results to report.

any CLEC's were receiving this notification the results show that in two of the last three months with reported results Qwest achieved parity.[7]

Moreover, billing completion notifications are just one small part of the pre-ordering, ordering, and billing aspects of OSS covered by checklist item 2. AT&T completely ignored Qwest's exemplary performance with respect to gateway availability, pre-order response times, LSR rejections, firm order confirmations, and the like. As I demonstrated in detail in my originally-filed testimony, when it comes to providing access to network elements, including OSS and UNE Combinations, Qwest's performance has met checklist requirements. Qwest is providing every element of the checklist at an acceptable level of quality. Performance results from March 2001 through February 2002 for South Dakota are attached as Exhibit MGW-PERF-1. For gateway availability Qwest exceeded the 99.25% standard in every month, with very few exceptions.[8] Pre-order response times were shorter than established benchmarks for every transaction, in every one of the last 11 months.[9] Likewise, for every category of electronically received LSR, rejections were timely in every month since May 2001[10] and firm order confirmations were provided within agreed upon standards in every

---

[7] Ex. MGW-PERF-1 at 56, PO-7B.

[8] Id. The exception was again December 2001. The code error described in footnote 19 caused the miss in that month.

[9] Ex. MGW-PERF-1 at 28-19, GA-1, GA-2, GA-3, GA-4 and GA-6

[10] Id. at 31 - 43, PO-1.

[11] Id. at 48, PO-3.

[redacted] in the last twelve months for every one of the OSS related [redacted] instances of performance below the established standard [redacted] Viewed in context, as part of the overall checklist item 2 [redacted] these data demonstrate that Qwest is providing nondiscriminatory [redacted]

2. BI-3A – Billing Accuracy

[redacted] correct that Qwest's performance under BI-3A, which measures billing [redacted] was deficient from October through December 2001.[7] [redacted] performance suffered during those months because Qwest was adjusting its [redacted] to true-up contractual rates with cost docket rulings. When that process [redacted] Qwest's wholesale performance returned to normal. In January and [redacted] Qwest's bills to CLECs were 99.35% and 98.44% accurate, [redacted] Although the difference between these results and the retail parity [redacted] by the PIDs was statistically significant, the difference between [redacted] was 1% or less, and was not competitively significant.

3. BI-4A – Billing Completeness

[redacted] also questioned Qwest's performance under BI-4A, but in each of the last [redacted] Qwest's bills to CLECs have been more than 98% complete. Those [redacted] were at parity with retail in December and February and very close to parity in

---

[redacted] at 91 - 94, PO-5

[redacted] Comments at 7

Ex. [redacted]-1 at 66, BI-3A

January. Retail performance was only 0.39% better than wholesale in January. This tiny difference is an example of where statistical significance does not equate to competitive significance.

Moreover, Qwest's performance under BI-3A and BI-4A must be assessed in the context of Qwest's overall OSS performance under checklist item 2. As a whole, Qwest's performance clearly satisfies the requirements of checklist item 2.

4. OP-4 Installation Interval – UNE-P POTS, No Dispatches

AT&T asserts that, for this competitively significant service, Qwest has provided discriminatory service to CLECs in the last four months. In reality, though the performance differences yield statistical scores that would imply disparity in service, the magnitude of the differences are so small as to not be significant to competition (i.e., differences of only .03 to .27 days). In the latest performance report for Qwest there was no statistically significant difference in performance for two of the last four months. In the two months where there was statistical difference, the practical difference is negligible at only .1 to .27 days. From another perspective, looking at the four-month average results for November 2001 – February 2002, the average installation interval was less than .04 days greater for CLECs than for retail which equates to one in 25 orders with an interval 1 day longer than retail. Additionally, during that same period, Qwest met its installation commitments 100% of the time in three of the four months and better than 99% of the time in the fourth month.[6] Clearly, looking at the entire

[6] See BI-4A

[7] See OP-3C and OP-4C

performance picture for UNE-P POTS installation, the pattern is one of outstanding, non-discriminatory service.

5. MR-8 Trouble Rate – UNE-P Centrex

AT&T's arguments concerning this metric are nitpicks. From November through February, the wholesale trouble rate for UNE-P Centrex was never higher than 0.57%. The difference between retail and wholesale performance was never greater than 0.51%.[24] Although the wholesale results were not in parity with retail, statistically-significant disparities have no practical significance when more than 99.4% of all CLEC UNE-P Centrex facilities are trouble free every month. In addition, the trouble rate is just one small part of Qwest's overall UNE-P performance. During the last four months, Qwest consistently achieved parity under every other UNE-P repair metric.

6. OP-17 – Timeliness of LNP Disconnects

Since it began measuring its performance under OP-17 in October 2001, Qwest has completed 100% of LNP disconnects in a timely manner.[25] Nonetheless, AT&T argues that because it proposed an amendment to OP-17 that *might* alter the performance results, "it is premature to reach any conclusion regarding Qwest's performance on LNP."[26] This argument is absurd. OP-17 was negotiated by the parties and adopted by the ROC TAG. Qwest is accurately reporting its performance under the PID as accepted by the parties. AT&T does not dispute this fact. Qwest's performance

---

[24] *Id.* at 90, MR-8.

[25] *Id.* at 164, OP-17.

[26] AT&T Comments at 9.

to date has been perfect. Unless and until the PID is amended, the fact that AT&T has requested an amendment is irrelevant.

The Arizona Corporation Commission recently rejected the same argument by AT&T, and for good reason.[1] Qwest sets the 10-digit trigger for numbers to be ported by 11:59 p.m. on the business day preceding the scheduled port date. Under OP-17, if a problem occurs on the CLEC side, they must notify Qwest by 8:00 p.m. Mountain Time on the scheduled port date. When that occurs, Qwest has ensured that there was no untimely disruption of end user service in South Dakota 100% of the time. To accommodate CLECs, Qwest agreed that if the CLEC notifies Qwest of a problem by 12:00 p.m. on the day after the scheduled port date, Qwest will use it's best efforts to ensure that the end user's service is not disconnected prior to 11:59 p.m. on that day (or, in the case of a cancellation, that no disconnection occurs). AT&T is now arguing that, for purposes of OP-17, CLEC notification should be considered timely as long as it is submitted by 12:00 p.m. on the day after the scheduled port date. AT&T's approach would unfairly shift the burden of a CLEC problem onto Qwest, and require Qwest to try to undo a scheduled port on very short notice. For those reasons, Qwest believes that ultimately the TAG will reject AT&T's proposed amendment.

In any event, the proposed AT&T amendment is just that – a proposal. Qwest's performance under OP-17, as written, has been perfect.

---

[1] See Decision No. 64629, Arizona Corp. Comm'n Docket No. T-00000A-97-0238, Order at 4-9 (March 15, 2002).

7. OP-3C – Installation Commitments Met, Residence Resale

This is another example of AT&T nitpicking excellent performance. From November through February, Qwest met at least 98% of its installation commitments to CLECs for residence resale, no dispatch. In January and February, Qwest's wholesale performance was better than retail, with a 99.61% success rate in February.[20] It defies common sense to suggest that the slight difference between retail and wholesale performance in November and December had any detrimental effect on competition. Moreover looking beyond this single measurement we find that Qwest's average interval for CLECs in this same period shows parity in every month.

8. MR-7C – Repair Repeat Reports, Residence Resale

Wholesale and retail service were at parity under this metric in January and February. AT&T correctly notes that Qwest failed to achieve parity in November and December,[21] but the shortfall in performance on the wholesale side was slight and the results in those months were atypical. November and December were the only months in the last 12 in which wholesale performance was not at parity with retail. In the other 10 months, CLECs never submitted more than six repeat trouble reports.[22]

9. MR-8 – Trouble Rate, Residence Resale

Qwest met the parity standard for this PID in two of the last three months. The overall trouble rate for residence resale was at or below 1.23% during those months. In

---

[20] Ex. MGW-PERF-1 at 169, OP-3C.

[21] AT&T Comments at 11.

[22] Ex. MGW-PERF-1 at 175, MR-7C.

January, the only month when Qwest failed to achieve parity, the difference between retail and wholesale performance was a meager 0.33% and was not competitively significant.[31]

10. OP-4C – Installation Interval, Business Resale

It is true that Qwest's reported results show some problems in the time it takes to install business resale services when no dispatch is required. However, when taken in the context of business resale installation results overall, the performance problems with non-dispatched installations can be seen as an anomaly. Specifically, in three of the last four months, Qwest met its installation commitments 100% of the time for non-dispatch business resale.[32] For dispatches within MSA areas, both installation commitments met and installation intervals,[33] Qwest results were in parity in every one of the last four months. Performance results in non-MSA areas were nearly as good, showing parity in every month for installation commitments met and, for installation intervals,[34] in the most recent two months. Additionally, looking at the remaining measurements covering both installation and repair for non-dispatch business, there were no measurements with more than one month of statistically significant disparity.[35]

---

[31] *Id.* at 176, MR-8.

[32] *Id.* at 181, OP-3C.

[33] *Id.* at 179, OP-3A, OP-4A.

[34] *Id.* at 180, OP-3B, OP-4B.

[35] *Id.* at 181-183, OP-6A-3, OP-6B-3, 187-188 , MR-3C, MR-4C, MR-6C, MR-7C, MR-9C.

No pattern of discrimination can be deduced from results showing this kind of performance. Rather, a pattern of non-discrimination is clear.

11. MR-8 – Trouble Rate, Business Resale

AT&T claims Qwest's reported results show that Qwest is doing a worse job of maintaining CLEC business retail lines than it does for similarly situated retail customers. Once again, AT&T puts too much weight on statistical significance, and too little weight on practical significance. It is true that Qwest only achieved parity under this PID in two of the last four months (November and January). However, over the entire four months, the trouble rate was never higher than 0.73%, and the difference between retail and wholesale troubles was never more than 0.25% (in December).[20] Differences that small in an isolated month have no measurable effect on competition.

Moreover, it bears repeating that these results must be considered as part of the overall resale performance picture. AT&T's silence with respect to all of the other resale measurements confirms that Qwest's overall resale performance has been outstanding.

12. MR-8 – Trouble Rate, DS-1

AT&T questions the reliability and quality of results being reported for DS-1 Trouble Rate, MR-8. Qwest did discover that it's code was picking up non-wholesale inventories for DS-1 in it's repair counts. This problem was corrected in the February 2002 report and corrected historically back to December 2001. Qwest informed AT&T that this would occur in a hearing in Colorado. Updated performance results indicate parity in two of the three corrected months included on the report.

---

[20] *Id.* at 187, MR-8.

13. E911

Finally, AT&T suggests that there is a communication problem between Qwest and its E911 database administrator, which impairs CLECs' ability to have updated E911 information entered into the database.[13] AT&T mischaracterizes the issue in ascribing the migrate failures to a Qwest performance problem. Qwest's expert witness on E911, Margaret Bumgarner thoroughly describes the industry problem underlying the delay in unlocking records. Her affidavit describes in detail the new process that has been put in place by Intrado, the E911 database administrator and outlines the impact of this new process. AT&T admits, however, that the database administrator "recently changed its process and it appears to have addressed the problem."[14] In fact as cited in Ms. Bumgarner's affidavit, in recent proceedings in Arizona, AT&T has now requested that Intrado provide the same validation and unlock process for AT&T's records, too, and urged the Arizona Commission to require all other service providers to subscribe to the new migrate/unlock process with Intrado. AT&T has not adduced any evidence that this "problem" has any adverse affect on competition. AT&T implies that it would be appropriate to develop a performance measurement to insure that the new process continues to be followed. There are two fundamental reasons this would not be appropriate. First of all, the migrate failures are not a Qwest problem, but an industry problem, as evidenced by the fact that the industry forum NENA has endorsed a solution. (The same solution Qwest has already implemented.) Secondly, the

---

[13] AT&T Comments at 14.

[14] *Id.*

performance to be measured would not be Qwest's but Intrado's; therefore it would not be possible or appropriate to hold Qwest accountable for this issue. Finally in light of Qwest's strong performance demonstrated by measurements accepted by the ROC parties, the Commission should find that Qwest has satisfied the requirements of checklist item 7.

II. SUMMARY AND CONCLUSION

Qwest's overall performance satisfies the requirements of each measured checklist item. Qwest's processes, procedures, capabilities, and performance ensure that efficient competitors have a meaningful opportunity to compete in South Dakota. Based on this evidence, the South Dakota Commission should find that Qwest satisfies checklist items 1, 2, 4, 5, 7-11, 13, and 14 in Section 271.

Checklist #1 - Local Interconnection - LIS Installation

Installation Commitments Met (Percent) (OP-3D)-- Interval Zone One
Installation Interval (Average Days) (OP-4D)-- Interval Zone One
Delayed Days for Non-Facility Reasons (Average Days) (OP-6A-4)-- Interval Zone One
Delayed Days for Facility Reasons (Average Days) (OP-6B-4)-- Interval Zone One
Installation Commitments Met (Percent) (OP-3E)-- Interval Zone Two
Installation Interval (Average Days) (OP-4E)-- Interval Zone Two
Delayed Days for Non-Facility Reasons (Average Days) (OP-6A-5)-- Interval Zone Two
Delayed Days for Facility Reasons (Average Days) (OP-6B-5)-- Interval Zone Two
New Service Installation Quality (Percent) (OP-5)-- Interval Zone One and Two
New Service Installation Quality (Percent) (OP-5)-- Interval Zone One and Two*
Interval for Pending Orders Delayed Past Due Date (Average Days) (OP-15A)
Count of Pending Orders Delayed for Facilities Reasons LIS Trunk (OP-15B)

Checklist #1 - Local Interconnection - LIS Repair

All Troubles Cleared within 4 hours (Percent) (MR-5A)-- Interval Zone One
Mean Time to Restore (Hours:Minutes) (MR-6D)-- Interval Zone One
Repair Repeat Report Rate (Percent) (MR-7D)-- Interval Zone One
Repair Repeat Report Rate (Percent) (MR-7D)-- Interval Zone One*
All Troubles Cleared within 4 hours (Percent) (MR-5B)-- Interval Zone Two
Mean Time to Restore (Hours:Minutes) (MR-6E)-- Interval Zone Two
Repair Repeat Report Rate (Percent) (MR-7E)-- Interval Zone Two
Repair Repeat Report Rate (Percent) (MR-7E)-- Interval Zone Two*
Trouble Rate (Percent) (MR-8)-- Interval Zone One and Two
Trouble Rate (Percent) (MR-8)-- Interval Zone One and Two*
Customer and Non-Qwest Related Trouble Reports (Percent) (MR-12)-- Interval Zone One and Two

Checklist #1 - Collocation

Scheduled Interval 90 Calender Days or Less (Average Days) (CP-1A)
Scheduled Interval 91 to 120 Calendar Days (Average Days) (CP-1B)
Scheduled Interval 121 to 150 Calendar Days (Average Days) (CP-1C)
Forcasted Collocations (Percent) (CP-2A)
Non-Forcasted & Late Collocations (Percent) (CP-2B)
Collocations with Intervals Longer than 120 Days (Percent) (CP-3C)
Collocation Feasibility Study Interval (Average Days) (CP-3)
Collocation Feasibility Study Commitments Met (Percent) (CP-4)

Checklist #1 - Trunk Blocking

Trunk Blockage to Qwest Tandem Offices (Percent) (NI-1A)
Trunk Blockage to Qwest End Offices (Percent) (NI-1B)
Trunk Blockage to Qwest Tandem Offices (Percent) (NI-1C)
Trunk Blockage to Qwest End Offices (Percent) (NI-1D)

Checklist #2 - Gateway Availability

Gateway Availability - IMA-GUI (Percent) All (GA-1A)
Gateway Availability - IMA-GUI (Percent) Fetch-n-Stuff (GA-1B)
Gateway Availability - IMA-GUI (Percent) Data Arbiter (GA-1C)
Gateway Availability - IMA-EDI (Percent) Default (GA-2)
Gateway Availability - EB-TA (Percent) Default (GA-3)
System Availability - EXACT (Percent) Default (GA-4)
Gateway Availability - GUI - Repair (Percent) Default (GA-5)

Checklist #2 - Gateway Availability

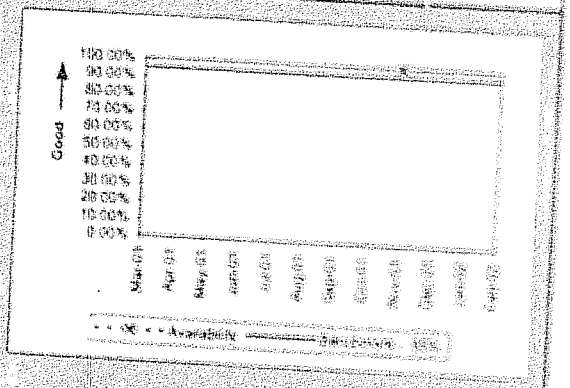
Timely Outage Resolution following Software Releases (Percent) Default (GA-7)

Date	Availability
Mar-01	
Apr-01	
May-01	
Jun-01	
Jul-01	
Aug-01	
Sep-01	
Oct-01	
Nov-01	
Dec-01	100.00%
Jan-02	
Feb-02	



If the Outage volume is less than 20 in the reporting month, the standard is 1 miss
