RE: Fort Randall Telephone Company (Fort Randall) Intrastate Switched Access Services  
Revised Tariff Pages

Dear Ms. Van Gerpen

Attached for electronic filing is the revised Fort Randall tariff page to implement the Federal Communications Commission's Intercarrier Compensation Reform Order, FCC 11-161. The Order capped intrastate rates at December 29, 2011 levels and began a nine year transition to bill-and-keep. As of July 1, 2012 companies will transition to terminating intrastate rates established through the rules contained in FCC 51.909, or one-half of the difference between the amount of revenue collect when the same demand is multiplied by both the interstate and intrastate capped rates.

Fort Randall has elected to continue utilizing their intrastate rate structure as the revenue generated by utilizing their current Local Transport rate is less than revenue generated by utilizing their interstate transport rate structure. Therefore, Fort Randall relied on 51.909 (b)(2)(iv) to calculate their Transitional Rate which was then utilized to reduced the End Office rate elements.

Fort Randall has attached the calculation of the Transitional Rate as confidential as the calculation contains details about Fort Randall's revenues and volumes of access minutes. Fort Randall also attached a redacted version for public view of the methodology utilized to calculate the reduced intrastate terminating rates.

If you have any questions in reference to this filing please contact me.

Sincerely

Consortia Consulting
