

ACCESS SERVICE

14. Toll VoIP-PSTN (Continued)

(N)

14.2 Calculation and Application of Percent-VoIP-Usage Factor (Continued)

- (4) Sprint will apply the PVU factor to the total intrastate access MOU exchanged with the customer to determine the number of Relevant VoIP-PSTN Traffic MOUs.

Example 1: The PVU-S is 10% and the PVU-C is 40%. The PVU factor is equal to $40\% + (10\% \times 60\%) = 46\%$. The Company will bill 46% of the customer's intrastate access MOU at the Company's applicable tariffed interstate or intrastate switched access rates, whichever is lower.

Example 2: The PVU-S is 10% and the PVU-C is 0%. The PVU factor is $0\% + (10\% \times 100\%) = 10\%$. The Company will bill 10% of the customer's intrastate access MOU at the Company's applicable tariffed interstate or intrastate switched access rates, whichever is lower.

Example 3: The PVU-C is 100%. No matter what the PVU-S factor is, the PVU is 100%. The Company will bill 100% of the customer's intrastate access MOU at the Company's applicable tariffed interstate or intrastate switched access rates, whichever is lower.

- (5) If the customer does not furnish the Company with a PVU-C pursuant to the preceding paragraph 1, the Company will utilize a customer PVU-C of 0%.

14.3 Initial PVU Factor

In calculating the initial PVU, Sprint will take the customer-specified PVU-C into account retroactively to December 29, 2011, provided that the customer provides the factor to Sprint no later than August 31, 2012; otherwise, it will set the initial PVU equal to the PVU-S, as specified in subsection 14.2 (2) above.
