

Response of Correct Solutions, LLC

To Staff Information Request

DN TC-14-025 #3

- 3-1) Would Correct Solutions request a waiver for ARSD 20:10:24:02(9) pertaining to submitting their most recent 12 month period cash flow statement?

Response: Correct Solutions requests a waiver of the requirement to submit a cash flow statement. The Company does not routinely require one in the normal course of business, and it would be an additional expense which it would prefer to avoid if permissible.

- 3-2) Explain the negative net income on the financial sheet filed in data request 2.

Response: Correct Solutions has been in business since February 2012. During their first two years in business they experienced some large operational start up costs that are reflected in the 2013 financials. This is very common in a competitive industry. They do not anticipate these large expenses going forward, and have been in the "black" since March 2014.
